JAVASCRIPT
Assignments

Task1:

JAVASCRIPT FORM VALIDATION: Design a form and make use of validations using JavaScript, so that mandatory fields should not be left blank and each field can store only defined data type in it.

Task2:

Create a page having any 30 names in it then create a search box on top of it in a way that if we write first two letters then it will recommend the names from below list starting with those two letters.

Task3:

Create a clock using JavaScript.

Task4:

Study about Microsoft Power Apps.

➔ **Kindly submit all tasks within the specified deadline.**
